EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

None of the references discloses alone or in combination, a device for detecting three-dimensional shapes of an elongated flexible body, comprising a sensor cable having two pairs of fiber Bragg grating strands each having a plural number of refractive index change portions periodically in a predetermined pitch; and a signal processor adapted to receive reflection diffraction light signals from the refractive index change portions of each fiber Bragg grating strand, and to detect a three-dimensional shape of the elongated flexible body by measuring degree of straining at each one of the refractive index change portions by way of comparison of the reflection diffraction light signals with a reference wavelength, in combination with the remaining claimed limitations.

The most relevant references, Lauzon et al. (U.S. Patent 5,671,307) disclose a temperature gradient to impose a chirp on a fiber Bragg grating. Eggleton et al. (U.S. Patent 6,307,988) disclose a chirped fiber Bragg gratings with dispersion compensation module to compensate for temperature induced variations. And Wakabayashi et al. (U.S. Patent 6,625,355) disclose dispersion compensating element. However, there are no disclosures in the documents cited disclose or suggest all the above limitations of the claimed invention.

Claims 1-6 are therefore allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
